

Flat Roof East West

2P9 Installation Unit | East-West Dual-Tilt Table

INSTALLATION UNIT	MODULES / UNIT	CAPACITY / UNIT	MOQ
2P9	18	10.71 kWp	3 pallets

KEY SPECIFICATIONS

PV Module	GStar GSD7S72T-595WT
Module Layout	2 portrait x 9 columns (dual tilt)
Module Size	2278 x 1134 x 30 mm
Tilt Range	5 - 10 deg (East / West)
Rails	ZAM steel P5500 channel or equivalent
Structure	ZAM or galvanized steel
Foundation	Ballast / site-specific
Reference Snow Load	3600 Pa - verify project basis
Reference Wind Load	2400 Pa - verify project basis
Structure Warranty	25 years

SYSTEM COMPONENTS

- PV modules with MagicFrame interface
- ZAM rails / purlins
- Ballast trays / feet
- Connection hardware and accessories

IMPORTANT

Ballast weight and roof dead load must be verified against structural drawings. East-west layout maximizes modules per roof area.
